Background

Our Sustainability

Few places in the world are as suitable as Maine for sustaining marine resources—in fact, Maine lobstermen were making it a priority long before "sustainability" became a buzzword. The Maine Lobster industry's innate focus on sustainability and conservation from trap to table is a collaborative effort of both the government and the private sector. Lobsters are harvested by hand, one trap at a time, to protect their quality and marine habitat. The Maine Lobster community has strived to stay at the forefront of conservation innovations, advocating and adding new regulations as the need for them becomes apparent.

Tail Notching:

Female lobsters with visible eggs cannot be harvested. Before releasing her, the harvester notches her tail to identify her as a good breeder, thus protecting her for life from being harvested.

Minimum Size Limit:

Minimum 3 1/4" carapace measurements allow juvenile lobsters the chance to mature and reproduce before they can be harvested.

Maximum Size Limit:

Maximum 5" carapace measurements protect the large, healthy breeding stock.

Apprentice Program:

New harvesters must apprentice with veterans to learn the regulated, sustainable practices.

Trap Limits:

PREPARATION 2: CHOOSE AN OPTION FOR DATA UPLOADING

MANUAL SEMI AUTOMATIC AUTOMATIC

HOW MANY ARTICLES DO YOU HAVE? HOW OFTEN DO YOU SUPPLY TO METRO?

METRO NOM

PREPARATION 3: REQUEST FOR GLN & GTINS FROM YOUR LOCAL GS1

GS1 GLOBAL – find & contact

https://www.gs1.org/

Search by GLN – check your GLN

http://gepir.gs1.org/index.php/search-by-gln

Search by GTIN – check existing or new GTINS

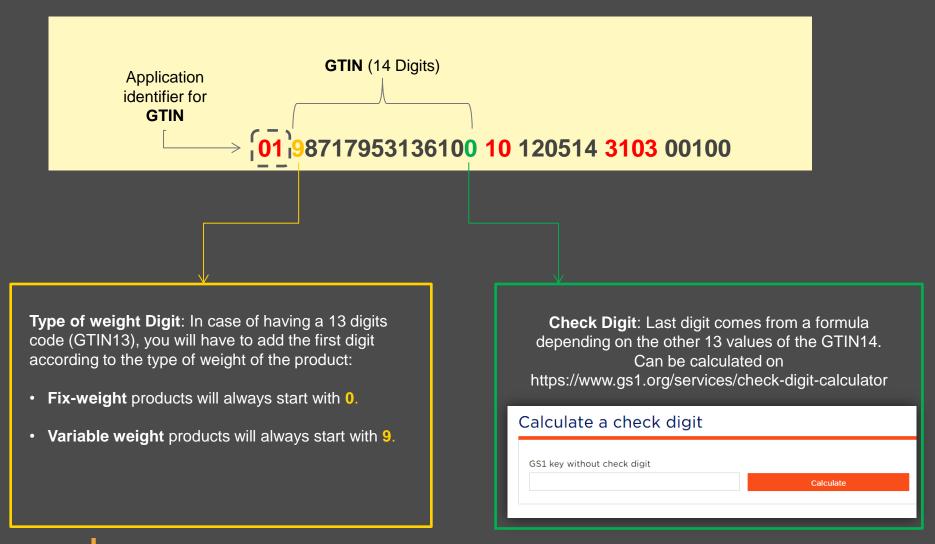

http://gepir.gs1.org/index.php/search-by-gtin

METRO NOM

PREPARATION 4 (1/2): CREATION OF GTIN 14

From your Local GS1 Provider you will receive a 13 digits code (GTIN13). In order to build your GTIN14 you have to add the first digit and then recalculate the last (check digit).

METR

PREPARATION 4 (1/2): CREATION OF GTIN 14 STEPS TO CHECK YOUR GTIN14

- 1. Add your GTIN13 in the search bar
- 2. Add 0 or 9 at the beginning of your GTIN13
- 3. Delete the last digit
- 4. Click on "Calculate check digit"
- 5. You will receive your GTIN14

Calculate a check digit
